Barriers To Prosperity

A few short years ago—less than fifteen, in fact—all the principal nations in the world were allied in an effort to smash Germany. They had no other alternative and by an almost superhuman effort they succeeded. Today these same nations are engaged in the task, almost as difficult, of trying to rehabilitate Germany and again place it on its feet and re-establish it as one of the great and prosperous nations of the world.

Why this seeming inconsistency? Following the great wars of the past, the victors were not over-anxious to see the vanquished quickly restored. Following the close of the Franco-Prussian war, and the imposition of a huge indemnity upon France, when it was found that France was paying up much more rapidly and easily than Germany anticipated would be the case, there was a strong movement in Germany again attack France and crush her before she regained her strength.

Today the situation is entirely different, and we find the statesmen, bankers, industrial and financial leaders of all the great nations striving with might and main to help Germany out of the difficulties into which her disastrous war experience has plunged her. Even the United States, notwithstanding its traditional policy of isolation—and its formerly held belief that it could and should cut itself from the rest of the world, and that no matter what Europe might do, or how badly it might be afflicted, it was none of Uncle Sam's business and in no wise concerned him—was now just as keen to assist in the recovery of Germany as are the other nations. And all the nations are ready to make sacrifices to help their former enemy.

Again the question—Why? Because, and as one paper says, it's "old stuff" but we are only now coming to believe it, the truth has been discovered that the well-being of our neighbor, no matter whether he lives in the next block or five thousand miles away, is well-nigh as important to us as our own. The interdependence of all individuals, communities and nations is at last being recognized and to some extent understood.

Let us quote the financial editor of a well known Canadian paper: "To destroy or cripple Germany, Austria, China, Chile or any other country or countries is to cripple and impoverish ourselves; no matter whether members of this world community suffer, cannot escape suffering ourselves. No fence can be built high enough to keep out this suffering. Ten million would-be workers suffer inside the United States' tariff wall. If foreign trade is essential to our own prosperity, if we would sell our own products to the peoples of other countries we must not make it impossible for them to sell their goods to us. Little Johnny who wants to eat his cake and have it too shows no less sense than the creators of the Hawley-Smiley tariff."

The writer is not going to discuss Canada's tariff policy—that is, unfortunately, a partisan political issue, and party politics are rightly excluded from this column—but the larger issue of international trade, and of all tariffs as they affect the ebb and flow of that trade, is a subject which the peoples of all nations will do well to study, discuss and try to understand.

Barriers between nations are especially man-made artificial barriers. *There are no walls we can't see what their nature. No one nation by itself can remove such evils; it can only be done by agreement, by international co-operation and action. For example, no one nation can afford to wipe its army or its army out of existence while other nations remain armed to the teeth, no matter how much it might like to do so. But it can be done by international agreement.*

So, we have the Washington Conference for the limitation of naval armaments which has already succeeded in reducing to some extent the huge burden of taxation rendered necessary for the creation and maintenance of navies. Very soon a great world conference is to take place with the object of trying to bring about a general reduction in all armaments. The world is beginning to see the necessity for these agreements. If they could only agree to wipe out all armaments whether on the land, the sea, or in the air, all would be the gainers, and all would be on as near an equal footing as they are today.

So, too, in the matter of economic warfare on each other. If frontiers, no so far as Customs houses are concerned, were wiped out, the world would be the gainer all round, and one of the dire causes of international friction and jealousy would be removed, and with it removed would also go one of the chief reasons why so many nations feel they must have large armies and huge naval establishments.

It is the burden imposed by these barriers, naval, military, economic, that is crushing the world today, handicapping the world in all, causing world depression in business with all its attendant evils of unemployment, with a surplus of products in one country and lack of the necessities of life in another, and, as an inescapable result, human suffering, loss and discontent leading to economic and political strife, and ultimately, unless checked and the cause removed, to open rebellion and international war.

Phone Conversation Recorded

A complete record of long distance telephone conversation may be kept with the aid of a newly invented recording device. The device is a small, portable, and easily installed by the Inter-Telephone Company. The instrument consists of a magnetic steel wire, on which the remarks of both parties to the conversation are recorded as they are made. The record so made may be reproduced at any time.

Large Sum Found In Fruit Jars

Three fruit jars were found by Mrs. Ray Cook on her husband's farm near Lake Village, Ind. One of the jars was supposed to be \$17,150 in Government bonds. They were turned over to authorities, who began an investigation. They believed the bonds were stolen by bank robbers.

Suffered Severe, Painful Cramps In Her Stomach

These terrible cramps in the stomach that double you up in pain and make you look as if a cold perspiration may be stopped by a few doses of Dr. Fowler's Extract of Wild Strawberry.

Mrs. Lloyd Jones, 204 Argyle St., Halifax, N.S., writes: "I have suffered greatly from severe and painful cramps in my stomach. I tried several remedies without success. One day a friend advised me to take Dr. Fowler's Extract of Wild Strawberry, so I bought a bottle and got instant relief."

Inferior In Physique

Physician Claude South Africans May Become Physically Degenerate

A recent statement by Dr. C. Louis Leleup, a prominent physician at Cape Town, South Africa, to the effect that South Africans were inferior in physique and stamina to other European races, and critics of the view, which, in his opinion, might breed a race of degenerates, has aroused a good deal of adverse criticism in Cape, particularly from leading sportsmen and sports figures. However, Dr. Leleup sticks to his guns. In an interview with the Cape Argus, he says:

"My statement was founded on personal examination of more than 100,000 South African young men and boys and on the published statistics of the examination of more than 200,000 South African school children. I made no statement which has not been perfectly well known to the medical profession, the defence force, and the education department of the four provinces."

His critics, who pointed to South African sportsmen and athletes, based their conclusions on the prowess of the select few, and in point of fact were only expressing a misconception of the fact where South Africans were outstanding in the general world of sport. Dr. Leleup said. He claimed that his criticism had no racial tinge. He had dwelt on the effects of malnutrition and the economic conditions of the country, which would not only breed a race which threatened to become physically degenerate unless they were checked.

Public Building For Ottawa

Construction Of Five Million Dollar Building Is Forecast For Capital

A special despatch from Ottawa, published by the Toronto Globe, forecasts the construction of a \$5,000,000 public building in the Dominion capital as one of the undertakings in connection with the federal unemployment relief scheme. The despatch continues:

In Toronto, Montreal and Vancouver there is projected construction of three armories, which will cost about \$200,000 each. The armories will be built from money voted in the supplementary estimates this year, but the other buildings will come from the new account given to the minister of finance by parliament.

Marched Across Greenland

Achievements of Young Britons Matches Those Of Hardest Explorers

Three young Britons, members of the H. G. Watkins expedition, have marched across Greenland on the inland route from Angmagssalik to north to Ivigtut in the south, making the achievement of the hardest explorers.

James Scott, Martin Lindsay and Alfred Stephenson, started on July 1 and reached Ivigtut on July 30, travelling on skis by night, for the sun softened the ice cap to a point where daylight travelling was dangerous.

Example Not So Good

A new system of memory training was being taught in a village school, and the teacher was becoming enthusiastic.

"For instance," he said, "supposing you want to remember the name of a post—Bobby Burns. Fix in your mind's eye a picture of a policeman in flames. See—Bobby Burns!" "Yes I see," said a bright pupil. "But how is any one to know it does not represent Robert Browning?"

Date Is Advanced

Postmasters have been informed, according to the weekly bulletin published at Ottawa, that the last north-bound scheduled trip of the Peace River and North Vermilion Airmail service has been advanced. The last trip was scheduled for October 24, but has been placed at October 17.

Palestine now has nearly 3,000 automobiles.

SHE WORRIED ABOUT HER WEIGHT

"I started taking Kruschen Salts a month ago. I have lost 15 pounds in weight, and I feel as if I have lost 100. I am full of vim and vigor, before I was worried about my condition. I am happy and contented. I am a little heavier. But I am thankful to say that, were my troubles doubled, they would not worry me the least. I take one-half teaspoon of Kruschen Salts to the water of my glass after each breakfast."

Modify your diet, and take gentle exercise. The stomach, liver, kidneys and bowels are taxed up, and the pure, fresh blood containing these six salts is furnished by the Kruschen Salts. It is followed by "that Kruschen feeling" of energetic health and activity is reflected in bright eyes, clear skin, cheerful vivacity and charming figure.

The foreign diplomatic representatives in Berlin after investigation of the situation, are advising their countrymen as follows: The border tax does, of course, not apply to visitors from abroad. It is a measure intended to prevent Germans in Germany from leaving the country just now, which would entail the exchange of German money into foreign currencies, thereby affecting the stability of the German mark.

From this it is easy to see that there is no possible reason why foreigners should be asked to leave the country. Many instead of taking it out, should be included in the measure. Their holdings of foreign money, which they have brought into Germany, are, of course, also entirely unaffected.

Asking For Trouble

Colorado Releasing Five Hundred Convicts Under New Law

In releasing half the population of its state prison, all in one bunch, Colorado is asking for trouble. Scores of the blood-thirstiest in prison history, the big house at Canon City, is to be far fewer—or "au revoir"—in between 400 and 500 convicts who have suddenly come under the benefits of the new law which makes it possible, after the sixth year, to serve a year's sentence in 20 days. The Attorney-General of the State has ruled that the law is retroactive, thus affecting approximately half the prisoners.

They will now go forth, many of them to live down the past, but how many more to engage again in crime? Modern prisons, with all their tricks, do not cure the hard-boiled criminal. And a good percentage of the men in this wholesale exodus must be habitual offenders. Colorado has every right to view the prospect with alarm.

Cattle Shipments

Outfitting a number of additional vessels to carry Canadian cattle to the British market, undertaken by various steamship companies, has made possible a greatly increased movement to Great Britain this year. It is expected that from the present time to the close of navigation, 15,000 more head will be shipped, bringing the estimated total for the season to over 27,000 head.

A Corrector Of Pulmonary Troubles. Many testimonials could be presented showing the efficacy of Dr. Thomas' Electric Oil in correcting the respiratory organs, the pulmonary processes, but the best testimonial is experience and the Oil is recommended to all who suffer from these disorders with the certainty that they will find relief. Seven new aeroplanes built in Russia with funds obtained by public subscription are to be added to the Soviet Air Force, the war commissariat has announced.

The autumn manoeuvres of the Austrian army have been cancelled for this year in the interest of economy, it was announced in an official communique issued recently.

F. C. Hall, backer of the Post-Gazette record night around the globe, says he is studying navigation and plans to fly the Pacific westward next year. A pilot, Hall said, has not been selected.

Fifty-five million acres had been sown to spring wheat in Russia up to June 1, according to reports received by the British Ministry of Agriculture. Operations are reported to be backward in Siberia.

James Hirs, 27, of Valois, a suburb of Montreal, better known as Jimmy Britt, one-time flyweight boxing champion of Canada, was killed on the Quebec highway near the capital, when his automobile swung from the road and turned over in a ditch.

Figures released in Saskatchewan from an authoritative source, indicate that the official 1931 census return will give the city's population as about 42,000, an increase of 67 per cent. over the 1921 census, and 38 per cent. over the total given in the prairie census of 1926.

Cancer Research

Commission Finds That Important Progress Has Been Made

"How much does the latest research in cancer treatment were being obtained here surgical, X-ray and radium treatment were being combined, and we also found that remarkable steps have been made in cancer research," said Dr. W. T. Connell, who has just returned from Europe, where he was studying the cancer question with the Ontario cancer commission, appointed by the government of Ontario. A comprehensive survey of the cancer question and the treatments being used was made by the commission in both the United States and Europe.

"What the commission saw is most encouraging," said Dr. Connell. "We found from our investigations that where an organized movement was made to secure for the patient the three methods of treatment, X-ray and radium, the best results were secured, and the highest percentage of recoveries was recorded."

Manitoba Unemployed

Over Half Of Those Out Of Work Are Living In Winnipeg

Unemployed persons in Manitoba total 40,617, according to a careful survey of the province that has just been concluded by the provincial government with the aid of city, municipal, town and village authorities.

It is estimated that including dependents of unemployed the number of persons in the province without means of support is 105,000. This information was obtained at the request of the Dominion government which wanted to know the number of unemployed and their location before allocating funds for relief projects. It does not include farmers who have suffered crop failures.

Hon. W. R. Clubb, Director of Unemployment relief, has sent full details on the situation to Hon. Oulton Robertson, Federal Minister of Labour.

The total of unemployed for Winnipeg and its suburbs was found to be 20,767, an increase of 2,767 over the number of unemployed in June of this year.

Arthur MacNamara, assistant director of unemployment relief, estimated that the normal number of unemployed in a population of 270,000 in Winnipeg and suburbs is 70,000. Of that number over 20,000 now are out of work.

The total number of persons in Greater Winnipeg, including unemployed and their dependents, without means of livelihood is estimated to be 50,000 at the present time.

The other figures on unemployed sent to Ottawa show a total of 5,486 unemployed for St. Boniface, Brandon and Portage la Prairie; 4,033 for the towns and villages of the province, and 13,531 for the rural municipalities.

Figures on unemployed were sent to the province by the secretary-treasurer of each city, town, village and municipality in the province.—Manitoba Free Press.

Strange Cave Dwellers

People In Tunnels Live Underground To Escape Heat

Tunisia has perhaps the strangest cave dwellers in the world. They are found south of Gabes on the fringe of the desert, and in their efforts to escape the heat they have dug dwellings for themselves in the sand.

The traveller crossing the plain of Matmata comes across what appear to be wells, and is surprised to find that the wells are actually the laughter coming up from the earth. Looking down, he discovers in the half light a small courtyard, and tunnelled from the bottom of the well-like cavity are complete dwellings.

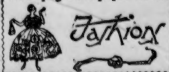

Access to these underground dwellings is through a slowly descending tunnel, and when the habitation proper is reached it is found to be beautifully clean and cool. The sun bakes the surface while the whole family, and there are stable for their animals.

Encouraging Report On Inspection Of Wheat

Grain Passed Through Department In Winnipeg Of Exceptionally High Quality

"Grain which has passed through the inspection department at Winnipeg is of exceptionally high quality. A considerable amount has graded No. 1 Hard, a great deal has gone No. 2 Northern, and some has graded No. 2 Northern on account of misadventure during shipment. This year's crop, so far as it has reached the inspection department is of an exceptionally high standard."

This was the statement made to officials of the World's Grain Exhibition and Conference by J. D. Porter, chief grain inspector, Winnipeg, with reference to the quality of cars of the 1931 crop from western Canada, which have already passed through the inspection department at Winnipeg.

Mr. Fraser stated that the grain they inspected had come from many different parts of the prairie provinces and indicated that the 1931 crop is of much higher quality than previous years. Double acreage conditions from spring seeding to harvest western Canada this year has produced, as far as present reports go, a quality of exceptionally high average.

This year's crop, therefore, was taken to indicate that the excellent examples of grain would be available for entry in the competitive classes of the World's Grain Exhibition and Conference to be held at Regina next year.

Death Of Toronto Publisher

Chas. Riddell, Late President Of Toronto Mail & Empire, Dies In Montreal

Charles Riddell, who built up the Riddell pulp and paper mills and was president of the Toronto Daily Mail and Empire, the Mail and Empire, for 50 years, died at his home in Montreal recently, aged 84.

From 1863, when he had a 15 he joined his brother, John Riddell, in building a paper mill at Merriton, Ont. Mr. Riddell was intimately associated with the pulp and paper industry of Canada until a few years ago, when his company was sold to the Canadian International Paper and Paper Company.

In 1877 he bought the Toronto Daily Mail, and Mr. Riddell remained its president until its sale in 1927. A period of 50 years, during which time he was a strong supporter of the Conservative party and an important factor in the establishment of the national policy under Sir John Macdonald in 1878.

The Empire newspaper was bought in 1891, the two forming the Toronto Mail and Empire.

Banked Savings In Canada

Couple From United States Thought

A dispatch from St. Thomas, Ontario, tells of a young couple from the United States who recently visited that city and who brought with them a large sum of money and deposited it in one of the banks at St. Thomas. The young couple admitted quite frankly that they had lost some of their savings in one bank failure in Pontiac, Mich. and had great fears for the balance of their next egg.

While the Canadian banks perhaps have a lot to answer for, we in Canada perhaps do not appreciate them as much as we should during periods of depression. Over on the other side of the line the number of bank failures this year has been appalling and the heavy losses among private citizens has been staggering in many centres.

Here in Canada a bank failure is a very rare thing, and anyone placing savings in one of our chartered banks, Government savings office or loan company is practically sure of the return of his money.

Explanations and Comments

The Return To Antioch From Jerusalem, 12:25.—Barnabas and Paul had been to Jerusalem to bring money from the church at Antioch to the brethren there who were suffering from a severe famine. Paul and John Mark were with them, probably as their attendant.

The Leaders At Antioch, 13:1.—In the flourishing church at Antioch there were numerous prophets and teachers, men of special inspiration. Among these was the energetic and lovable Barnabas of Cyprus. He included Symeon the Black—doubtless a false title of derision—of the province in North Africa lying next to Egypt, who perhaps was one of those five men who established this church at Antioch (Acts 13:20). Barnabas—another form of the Hebrew Menahem (2 Kings 15:14)—who was the "father-brother" of Herod the Tetrarch (Herod Antipas, son of Herod the Great), and was himself a person of some social importance and influence. Paul of Tarsus, the apostle, just as was Barnabas at the beginning of the roll of the leaders of the Antioch church were evidently Grecian Jews.

The First Foreign Mission, Chosen and Ordained, 13:2.—While the church, under the leadership of these five men, was carrying on the services of worship, prayer and fasting, an advance movement was initiated under the direction of God. It was probable that the prayer of the church was "awakening upon God for special guidance in the matter already occupying their thought; this matter was surely the question of a forward movement into the Roman Empire. Paul and Barnabas, indeed, may have been thinking of this question, when they had brought with them from Jerusalem John Mark.

Men of faith and wherever men are united spiritually, prayerful, self-denying, carefully taught in Christian truth, and waiting upon the Spirit of God for His guidance in the most profound impression of the work, then and there the scene is laid for a mighty Christian enterprise to have its auspicious beginning or to advance its success."

The First Foreign Missionary Work In Cyprus, 13:4, 5.—Under the leadership of their Commander-in-Chief—"Being sent forth by the Spirit"—Barnabas and Paul set out on their forward movement into the Gentile world. They went down the River Orontes to Seleucia, the seaport of Antioch, sixteen miles distant, and there sailed for the island of Cyprus in the Mediterranean Sea.

Historically this is the precise point where the foreign missionary enterprise actually began. The fact that the first missionaries were Gentiles takes back to that obedience of those men in that little ship. They took the message of Christ to the Gentiles and transplanted it from the cramping atmosphere of the Jewish synagogue to the openness of the whole world. It is apparently they act which, in simple fact, when looked at down in perspective of the centuries, is seen to have been the basis of the Christian world.—Basil Matthews.

The Battle Royal With Paganism, 13:12.—At Paphos, on the west coast of the island, Paul and Barnabas met the proconsul, Sergius Paulus, a man of understanding, and with him a sorcerer, named Elymas, or Elymas, as he was called in Greek. It is interesting that "Barnabas" has been found in which Sergius Paulus is expressly named as being the other of the two. We know that magicians of all kinds were favourably received in Rome, and it is in no way remarkable that one of these should have gained an influence with the proconsul.

Talkies Introduced To Students At Summer School

The "canned professor" has been introduced to the students of the summer school of Washington University in St. Louis. In a darkened hall, he appeared on the screen. With him were the charts and in his lecture. He pointed to them as he talked. Here was an educational talker in literal sense. Given the "canned professor," the syndicated professor may follow. One man may appear simultaneously at 1,000 summer schools. The possibilities are limitless. For example, with the chain grocery store we may yet have the chain college, the chain professor, the chain lecture before the camera at the central lecture room of the chain—Boston Transcript.

Grower Receives Bounty

Tenant Farmer Will Receive the Full Five Cent Bonus

Farmers who grow wheat on land based on a crop share basis will receive the Federal five-cent-bonus on wheat in exactly the same manner as actual owner-producers. Promise of this was contained in a letter received at Saskatoon by Dr. William Allen, of the farm management department at the university, from Hon. Robert Weir, Minister of Agriculture.

The Federal Minister of Agriculture was answering a query as to whether the tenant farmer would receive the full five cents or only a part of the bounty with a share going towards the owner of the land. He said the government intended to make certain the actual grower received the bounty.

Increased Postage

United States Boosts Postage On Letters To Canada and Newfound

Foundland
Increase of postage on letters to Canada and Newfoundland from two cents an ounce to three cents, and on postcards from one cent to two cents was announced at Washington by Second Assistant Postmaster-General W. Irving Glover, to become effective September 1.

At the same time air mail postage to Canada will be increased from five cents to six for the first ounce and ten cents for each additional ounce.

Would Extend Irrigation

Extension of irrigation works over 45,000 acres is sought by United Farmers of Alberta for the Purple Springs, Grass Lake, Burdett and Bow Island districts of Alberta. The farmer body urges a conference of interested farmers, Canadian Pacific Railway officials and Dominion and provincial government representatives to inaugurate the scheme.

said. "One road must ignore communities that have just as great claim as those that will be on the route. Have not Jager, Endomson, and Sakatonak as much claim to be included as Banff, Calgary and Regina?"

Mr. Munday pointed out that Cap-
lain's road problem was not a trunk
highway question, but one of linking
up all communities with good "all
weather roads."

Would Follow Gandhi

Many citizens of the United States
have written to Mahatma Gandhi
to join his moral policy of non-
resistance and to practice his prin-
ciples of self-denial, prayer and service
for others, but in no case has he en-
couraged them to come.

Many Mummy Found

A strange discovery, the mummy
of a native person about 25 years
of age, was made in Ruin Canyon
recently by Lee Snyder and E. S.
Noe. The body was encased in a bag
made of knitted bark. Well developed
teeth identified it as a mature per-
son.

EXCEL NEWS

Excel U. F. W. A. members
were the guests of Mrs. J. R.
Anderson on August 28. There
was a good attendance includ-
ing seven visitors. The meet-
ing was opened by singing an
"Old Hymn" and reading of the
creed. Roll call was answered
by "A reminiscence of our
Grandmother". The secretary
was instructed to write to the
Department of Health for a
date for a lecture and showing
of lantern slides by Mr. F. Cook
of that department.

Considerable discussion took
place regarding the inability,
owing to financial conditions,
of rural pupils in this district
to obtain the necessary Grade
XII standing for Normal en-
trance.

The Local accepted the in-
vitation of Sedalia U. F. W. A. to
attend a meeting to be address-
